

# Minutes of Meeting

## PRI Project Status Meeting – 28 November 2017

Location	EPITA courtyard	Time	16h-17h30
Attendees	Asheeth), Matthews, Mike, Prateek, Yvaes, Regis		
Absentee	Nicolas Pelletier (NP)		

## Agenda

Update on status and next steps

## Points Discussed

1. **Prateek** demonstrated login UI. Slideshow working, and images can be replaced as required.
2. **Yvaes** gave a walkthrough of the UI developed so far.
3. Discussion regarding functionality and pending items.

## Decisions Taken

1. **Prateek** to send the current UI file to Matthew for testing.
2. **Prateek** to work on the login page with the following additions –
  - a. “Remember me”
  - b. “Forgot Password”
  - c. Check box for Terms & Conditions
  - d. Box layout for “Login with Facebook” and “Login with Google”
3. **Prateek** to look into tile layout for dashboard.
4. QR Code value to be defined as –
  - a. For scan by Deliverer at Vendor : Order ID + Vendor ID
  - b. For scan by Deliverer at Customer: Order ID + Customer ID
5. Separate table to be created for Order Status
6. Laws around minimum age of Deliverer that can be enrolled to be checked. For the moment to consider that they should be 18+
7. Three separate apps to be developed for each group of users to ensure speed and avoid maintaining redundant data in the app.
8. It's possible for one person to have all roles – so each user should be able to download any of the apps.
9. Apps to be color coded so that there's no confusion about the usage.
10. Same email id can be used for all three apps. However, at one instance, only one app can be logged into.

## Action Points

Sno	Action Item	Owner	Date
1.	Send login UI file to Matthew	Prateek	28/11/2017
2.	Make corrections to UI file as discussed	Prateek	30/11/2017
